HIT Archive Appliance for secure long term storage

- Network ready 3.5 TB archive solution
- WIN Server 2008 R2 optional with PoINT JB-MGR or PoINT Storage MGR
- Industry standard Blu-ray technology
- Industry standard UDF file system
- Unlimited scalability
- Power consumption <10W/TB

HIT

The HMS 1035 NAS is a Blu-ray technology based optical library with 35 media and 2 industry standard drives. Unlimited capacity offline management supported by RFID'd magazines.

WORM and rewritable media with 50/100/128 GB capacity . Media reliability >50 yrs. Archive media are compatible with workstation drives. Integrated write verification.

WIN Server 2008 R2 operating system for professional administration, security and reliability.

PoINT JB Manager virtualizes the HMS 1035 in the explorer interface as shared volumes. High performance transparent read/write to Blu-ray media. PoINT Storage Manager provides tiered storage (HSM) architecture.

Dual network interface for redundancy, performance and enhanced administration with IPMI support.

HIT Archive Appliance for secure long term storage

Network integration:

- Integrated NAS Server with 500GB Raid1
- Dual GigE
- IPMI 2.0 service interface for remote administration
- WIN Server 2008 R2 features
- Unlimited scalability

File System Integration:

- PoINT Jukebox Manager Software
 - Storage virtualization of optical media as shared volumes
 - Library partitioning, selectable media and file spanning
 - Transparent, fast write/read and fast access through HDD based W/R cache
 - True WORM and ReWriteable media support, encryption
- PoINT Storage Manager Software
 - Tiered storage (HSM) architecture
 - Transparent migration and file access, compliant archiving
 - File level/volume level disaster recovery

HMS-1035 NAS:

- 35 media slots
- 2 standard Blu-ray drives
- Bandwidth up to 36MB/s per drive
- 1 magazine with RFID, 35 media
- Online media import/export through mailslot
- Bulk media import export through magazine
- Auto calibration
- 2 year warranty and 1 year onsite support
- Seamless NAS server integration
- Avg. power consumption <10W/TB
- Optional: 19" rack kit
