HIT Archive Appliance for secure long term storage

- Network ready 13 TB archive solution
- WIN Server 2008 R2 with PoINT JB Manager file system
- Industry standard Blu-ray technology
- Industry standard UDF file system
- Unlimited scalability
- Power consumption <10W/TB

HIT

The HMS 2105 NAS is a Blu-ray technology based optical library with 105 media and 2 or 4 industry standard drives. Unlimited capacity offline management supported by RFID'd magazines.

WORM and rewritable media with 50/100/128 GB capacity. Media reliability >50 yrs. Archive media are compatible with workstation drives. Integrated write verification.

WIN Server 2008 R2 operating system for professional administration, security and reliability.

PoINT JB Manager 7.0 virtualizes the HMS 2105 in the explorer interface as shared volumes. High performance transparent read/write to Blu-ray media utilizing the HDD cache.

Dual network interface for redundancy, performance and enhanced administration with IPMI support.
